Definition of Done - Feedlr

All stories must fulfill the following to be done:
- Builds without errors
- Code is either commented or written in a self-explanatory way.
- Code standards are met.

The following must be fulfilled for the project to be done:
- All code is completed.
- Unit test are written and passed.
- A quick guide for developers is provided.

Every release must include a release document explaining new features and differences from earlier releases.
